

ARABLAB

The Expo 2013

SPECIAL PREVIEW BY
OFFICIAL MEDIA SPONSORS
INTERNATIONAL LABMATE

The International Show for Tomorrow's Technology

SHOW PREVIEW

by Gwyneth Astles

Dubai again plays host to ARABLAB, the analytical industry's most powerful annual trade show.

Dubai will again host ARABLAB, the laboratory and instrumentation industry's biggest international show in the Middle East and Asia, and the only event that covers all of the important growth markets of the Middle East, China, the Indian sub-continent, south-east Asia and Africa. Now in its 30th year, ARABLAB has grown from just 40 pioneering exhibitors from a handful of countries to more than 700 of the industry's leading companies from all over the globe – focussing on laboratory technology, biotechnology, nanotechnology, environmental sciences, robotics and automation, analytical instrumentation, and measurement and testing – and is regarded by the industry as one of the most important annual events in the calendar, giving access to the world's most vibrant petrochemical sector and providing an introduction to the world's biggest biotechnology market. All the industry's foremost companies will be exhibiting, with national groups from Austria, China, Germany, India, Korea, Spain, Switzerland, Taiwan, and the United Kingdom, and with many seeking distributors throughout the region.

More Visitors

Visitor numbers too have grown. From a few hundred in 1983, ARABLAB now welcomes some 10,000 buyers and specifiers representing just about every discipline - grain technicians and forensic criminologists, university professors and industrial chemists, molecular geneticists and metallurgists, medical researchers and marine scientists all flock to Dubai from more than 70 countries to evaluate and purchase the latest technology and equipment. ARABLAB provides a unique showcase for the industry, drawing buyers, specifiers, end-users and distributors from all over the world, as well as providing a forum for industry leaders involved in medical, petroleum and environmental research and analysis, laboratory automation, and data process management.

The rapidly developing infrastructure of the Middle East and Asia has resulted in a huge demand for new and refurbished medical laboratory and clinical research facilities throughout the region. Laboratory projects, including mainstream sectors such as environment, health, education and petrochemicals are also being undertaken in China, the Indian subcontinent and throughout south-east Asia.

Dedicated Sections

With its dedicated sections, the entire exhibition - 20% larger than the 2012 event - has been designed to make it easy for visitors to find suppliers relevant to their area of interest.

MEDILAB - the buying source for effective Medical Research - addresses the needs of the growing Medical Laboratory Management and Clinical Chemistry Management sectors, enabling manufacturers to meet with medical technicians and clinical chemists.

BIOLAB - the one stop shop for the Bio Business – is a dedicated sector for the Life Sciences & Biotechnology industry.

PETROLAB - the research source for the petrochemical industry - provides face-to-face opportunities for technicians working in analysis, quality control, research, development and testing.

ENVIROLAB – the key to a better environment - makes it easy for specialist manufacturers to meet technicians and analysts working in the environmental pollution sector.

NANOLAB - tiny steps leading to giant leaps - featuring the very latest state-of-the-science technologies.

Expanded Programme of Seminars

Complementing the exhibition itself is ARABLAB's packed seminar programme, which offers invaluable opportunities to gain information about the industry's latest developments, as well as a convenient forum for discussion and networking. So popular have the seminars proved that the 2013 programme includes over 100 sessions, with discussion groups covering a wide variety of topics. All visitors to ARABLAB are entitled to attend seminars free of charge. However, with seats reserved on a first come, first served basis, the organisers recommend that visitors book their seats in advance on line at www.arablab.com.

ARABLAB will be held at the Dubai International Exhibition Centre from Sunday 10 March to Wednesday 13 March 2013.
All the latest information can be obtained at the ARABLAB website: www.arablab.com

A.KRÜSS OPTRONIC GMBH

Innovation since 1796 – for more than 200 years, A.Krüss Optronic GmbH has been a producer of high-end optical laboratory instruments. If you look for polarimeters, refractometers, density meters or microscopes, you will come across the product range of A.Krüss Optronic.

Lab software and product service ensures a customised all-in-one solution.

BIOCHROM LTD

Biochrom Ltd designs and manufactures quality scientific instruments in Cambridge, UK. Biochrom instruments are relied upon to provide critical measurements in many laboratories. The Company's amino acid analysers are used in hospitals worldwide to provide critical confirmatory diagnosis for inborn errors of metabolism (IEM) and in the food industry to assess the amino acid content of food and feedstuff.

Biochrom has expertise in UV/Vis spectroscopy: they make high performance double-beam UV/Vis spectrophotometers, dedicated micro-volume instruments for analysis of DNA and protein and microplate readers and washers for ELISA assays under brands such as Ultrospec, Libra, WPA and BioDrop.

ENDECOTTS LTD

Endecotts Test Sieves at Aralab.

Endecotts particle analysis equipment is used worldwide in many laboratories.

Endecotts test sieves are designed and manufactured to offer qualities that make them extremely precise and accurate whilst offering good handling, nesting and strength. They are available in different sizes, depths, materials and certified degrees of inspection to meet every National and International standard and virtually every specification, including ISO 3310 and ASTM E-11. All Test Sieve are supplied with a Certificate of Conformity.

Endecotts also offer a high quality range of analytical equipment – From Sieves Shakers (suitable for all types of sieving), to the widest variety of sieves and related particle sizing equipment.

CARBOLITE

Carbolite is the UK's largest manufacturer of

electrically heated laboratory ovens and furnaces. Recognised as a world leader Carbolite products are exported to over 100 countries worldwide for use in applications such as aerospace, ceramics, metals, mining, pharmaceuticals, electronics, composites and materials science.

Following their acquisition in 2012 Carbolite is now part of the Verder Scientific Division and as a result able to offer an even wider distribution network.

Operating temperatures are available up to 1800°C and sizes range from 3 litre standard products to 10,000 litre pilot scale and industrial furnaces and ovens.

Featured at the exhibition will be the entry level ELF furnace as well as the CWF, heat treatment and AAF ashing furnace, together with a simple tube furnace and the renowned Apex and Peak laboratory ovens.

Stand 460

F-DGSI

F-DGS offer innovating solutions in gas and laboratories

equipment. Don't buy your gas, make it! F-DGS gas generators offer comfort, reliability, economy and safety.

Products include: hydrogen generators, without maintenance, pressure max. 16 bars, purity 99.99999; nitrogen generators with PSA and membrane technology to enable F-DGS to match applications such as GC, ICP, COT, DEDL, sample evaporations and LCMS. A combined N2/air version is available; zero air generators with or without an integrated compressor to produce a dry, clean air, without hydrocarbons for GC-FID; F-DGS ultra air zero generators, unique system, combine an air dryer and zero air generator to obtain purities of air even higher; air dryers with and without CO2 are designed to match applications such as FT-IR, NMR, AA, TOC and rheometry.

All laboratory gas generators offer superb technical performance and end user benefits in the lab and the Company offer world-class service and support as standard.

ADVERTORIAL

Highly Economic Heating and Cooling

The current Julabo circulators of the 'Economy' series cover a working temperature range from -35 to +150°C. They offer a particularly attractive price-performance ratio. All models meet the very highest standards of accuracy, reliability, and performance. Intuitive operation and easy operational guidance permit fast configuration of all 'Economy' models for their respective application. The displays are extra bright and easy to read. Julabo offers two 'Economy' models: ED and EH.

Further information: www.julabo.de

MORE INFO. 122

Compact and Economic Cooling

The new product family by Julabo offers space-saving and eco-friendly recirculating coolers for simple cooling applications from -10°C to +40°C.

The F series of Compact-Recirculating coolers by Julabo are ideal for simple cooling tasks in laboratories and industry. The smallest recirculating cooler of this new family, the F250, was technically up-graded to provide a wider temperature range from -10°C to +40°C. The new recirculating coolers F500 and F1000 feature even higher cooling capacities and stronger integrated pumps. The pump of the F500 delivers 24 l/min at 0.5 bar, the stronger pump of the F1000 delivers 23 l/min at 1.0 bar.

All units of the F series feature impressive product benefits. Set points are easily entered via a 3-key-control panel. Temperatures are easy to read from a distance on the large, bright LED display. The PID temperature control guarantees a temperature stability $\pm 0.5^\circ\text{C}$. The filling port for the bath fluid is on the top and easily accessible.

The integrated display shows the fluid level at a glance. The compact, space-saving design permits flexible positioning on or below laboratory tables benches. Like every Julabo instrument, the sides of recirculating coolers have no venting slits and permit placement right next to each other or other laboratory units.

Thanks to their efficient, energy-saving operation, the compact recirculating coolers of the F series are ideal to replace cooling water. And the price is right making the purchase of a Julabo F series recirculating cooler a cost-efficient investment.

The new F Series on the Internet >> www.julabo.de/en/products/recirculating-coolers
